

A FEW FINAL DETAILS

- The start and finish of all courses are close together 400m from the car park

- **Course lengths**

Yellow/Orange 2.3 km

Light Green 4.1 km

Blue 7.4km

- The route to be followed on the **yellow/orange** course is fairly obvious, but although the features on which the control is placed will be visible from this route, the control itself may not be until you have gone to the feature. Therefore **you must look for the feature, not just the control.**
- The control descriptions are printed on the maps but **loose ones WILL NOT be available at the start.** They will however be available for download before the event from the WSX website.
- There are **a number of marshes marked on the map which are all out of bounds.** In any case crossing them would definitely not be the optimum route between any two controls.
- The **Blue and Light Green** courses skirt the edge of the Naturist Area on Studland Beach. However, given the time of year it seems unlikely that this area will be in use for its specific purpose!
- The **Blue** course makes two **unmanned crossings of the Ferry Road.** This does not tend to be very busy but cars can travel along it quite fast, so please take care crossing. If you are old enough to be on the Blue course, you should be old enough to cross a road safely!
