

*Today I have checked everyones track on maprun 6 and marked your scores according to the controls visited in the correct order.*

*it has taken me all day and is a very difficult task, I have had to discount some controls as competitors have taken either a route over a uncrossable Hedge or taken a route that is not on the map that everyone was given at the start.*

*It is unfair to competitors who don't know area to take a route off the map to gain an advantage*

*I have also discounted control 24 if your trace route does not show you going to the flag marking the control inside the Co-ops car park*

*I am sorry for the mistakes that were made with the control descriptions and in hindsight it would have been better to locate control 24 on the other side of the car park. We could have also made a better job of printing details on the map which was printed for the event in december 2020*

*odds and evens are very difficult to monitor but it does enable us to use small areas, just very difficult to work out results.*

*Please remember Orienteering is for fun, but if you wish me to check some scores before I post the final results on the wessex night league*
